Program -Project-Job: SNS-FES Ion Source and LEBT Mechanical Subsystems

Title: SNS-Front End Systems Design Package for LEBT-RFQ Isolation Valve

- **1. Scope:** This design package is a description of the LEBT_RFQ Isolation Valve. A low profile swinging vacuum valve used to isolate the SNS LEBT from the RFQ. It Lists all mechanical component and assembly drawing numbers as well as relevant engineering notes specifications and photographs.
- **2. Testing:** The isolation valve was was found to be Helium leak tight after being cycled 100 times with vacuum on both sides of the valve Seal Plate (25B0553).

3. Drawing List

25B0846 **Isolation Valve Assembly** 25B0814 Pivot Arm 25B0862 **Bushing** 25B0852-1 Shim 25B0823 Cam 25B0573 Stop Bracket 25B0852-2 Shim 25B0544 Arm 25B0563 End Fork 25B0553 Seal Plate 25B0623 Stop Bracket

Above drawings can be found in the LBL Mechanical Engineering Master File. They are stored in a compressed MI format (a Hewlett Packard-specific protocol) in UNIX directories with the path 'tmp_mnt/LBL/25B'
